REBUILT VS. ReNEWed[®]

Don't confuse the two! Rebuilt transmissions are usually done in a local shop and standards vary widely. Rebuilders do not have access to engineering prints or improvements and can only replace obviously worn or broken parts. Others are cleaned and simply reused. Diagnosing issues can be tricky. Not addressing the cause of failures leads to failure again and again.

No one knows these transmissions better than ReNEWed. Our state-of-the-art facilities utilize the same current assembly processes and quality standards as the OEM plant that built the transmission originally. Put quality, performance and value in your vehicle. Get ReNEWed!
